

GOZ013 - Wied tal-Ort

Description

Wied ta' l-Ort is a valley with numerous artificially constructed dams, located in central Gozo, within the outskirts of Rabat. The site is not accessible by the public as there are no passageways or footpaths available, however, the dam lakes are visible from a nearby surfaced road. The dam lakes cover an approximate area of 5,800m2. Culverts present within the road indicate the dam lakes are filled by water runoff thus being utilized as a flood mitigation measure. The water collected within the dam lakes are being used for irrigation purposes due to pipelines emerging from nearby agricultural land. The site was dominated by Persicaria senegalensis and Ricinus communis. The site is not protected by any legislation.

General information

| Basic information | |
|--|--------------------------------|
| Wetland location: | Inland |
| Wetland type: | Artificial |
| Natural / Artificial: | Dam lake |
| Area (Ha): | 0.60 |
| Hydrological interaction with other wetland: | Yes - GOZ015/GOZ006/GOZ004 |
| Water salinity: | Fresh (< 0.5 g/l) |
| Fresh water entry: | Catchment area (precipitation) |
| Surface water runoff: | Outflow controlled by pipeline |
| Open water area (%): | 26 - 50 |
| Hydroperiod: | Permanent |
| Geographic information | |
| Census district: | Gozo and Comino |
| Island: | Gozo |
| Local council: | Ir-Rabat, Ghawdex |
| Coordinates (WGS84): | 14.229500 E - 36.052650 N |

Biological significance

Biological significance: Low

Ramsar wetland types

Ramsar type
6 -- Water storage areas; reservoirs/barrages/dams/impoundments (generally over 8 ha)

Property status

Ecosystem Services, Activities & Impacts

Ecosystem Services

| Type of Ecosystem service | Ecosystem service | Scale of Benefit | Importance | |
|---------------------------|-------------------------|------------------|------------|--|
| Provisioning services | Food | | | |
| Provisioning services | Fresh water | | | |
| Regulatory services | Flood hazard regulation | | | |
| Regulatory services | Water purification | | | |
| Regulatory services | Water regulation | | | |

Activities on wetland

| Activities | Intensity |
|--|-----------|
| 020 = Resource conservation | High |
| 130 = Irrigation | High |
| 701 = water pollution | High |
| 790 = Other pollution/human impacts/activities | High |
| 910 = Silting up | Medium |
| 920 = Drying out | High |
| 954 = invasion by a species | Medium |

Activities on drainage basin

| Activities | Intensity |
|-----------------------------------|-----------|
| 100 = Cultivation | High |
| 110 = Use of pesticides | High |
| 120 = Fertilisation | High |
| 130 = Irrigation | High |
| 402 = discontinuous urbanisation | Low |
| 501 = paths tracks cycling tracks | Medium |
| 502 = roads motorways | High |
| 701 = water pollution | High |
| | |

Impacts

| Impact type | Intensity |
|--|-----------|
| ED- = Increase in sediment removal/retention | |
| EE- = Increase of economic potential | |
| ES- = Increase in water supply | |
| PF- = Fertilizer/Excess nutrient pollution | |
| PP- = Pesticide pollution | |

Habitats & Vegetation

Vegetation types

| Vegetation type | Coverage (%) |
|-----------------|--------------|
| Other | 5 - 25 |
| Wet meadow | 26 - 50 |

Species

Flora

| Species | Dominance | Reference |
|-------------------------|-----------|-----------|
| Persicaria senegalensis | | |
| Ricinus communis | | |
