

## GOZ002 - Qbajjar Salt Pans

### Description

Qbajjar Salt Pans are a series of salt pans, located in northern Gozo within the limits of Ħaż-Żebbuġ. The site is accessible by the public through a pathway. The salt pans cover an area of approximately 3,350m<sup>2</sup> and were originally constructed for the production of sea salt, however, the silt deposited in the salt pans and the broken salt pans present indicate that they are no longer being used. *Limbarda chrithmoides* was growing in between the salt pans throughout the site.
