

MAL089 - Il-Ponta tal-Gidien & Il-Ponta ta' Delimara

Description

Il-Ponta tal-Gidien & il-Ponta ta' Delimara are a series of salt pans, located in the outer periphery of Il-Kalanka tal-Gidien Bay within Marsaxlokk. The site is accessible to the public through an unsurfaced road. The salt pans cover an approximate area of 13,760m². The salt pans are likely no longer being utilised for salt production due to the presence of green algae in most of the salt pans. The site is predominantly surrounded by coastal habitat and in close proximity to the Kalanka Lighthouse. Some species present close to the salt pans include *Crithmum maritimum* and *Suaeda maritima*. Due to the presence of Coastal cliffs the Salt pans are classified as an Area of Ecological Importance under G.N. 400/96 and Area of High Landscape Value under G.N. No. 903/15 - GF 124/08. The site is within a No Trapping Zone under S.L 504.71.
